Project Type	Joint Projects - Curricular Reform	
Target country(ies) and	MK (9) - RS (2)	
Subject area	Humanities (language, archaeology, culture, law)	
Title	Regional Joint Degree Master of Intellectual Property Law	
Description	The project identifies the weak link between the educational system and legal system for protecting Intellectual Property in the Partner countries. The provision of specialist university courses in Intellectual Property Law is inadequate to train and update professionals working in the sector. The project will develop a Masters programme in Intellectual Property Law adapted to the needs of South Eastern and train PC academic staff in the EU. This will help promote the enforcement of Intellectual Property Rights to EU standards.	
Specific Objectives	Establishing Regional Joint Degree Master of Intellectual Property Law (MIPL), Retraining of professors, design and development of curricula, delivery of courses to students.	
Duration	36	
Total awarded amount	489.223,00 €

Title	Introduction and implementation of academic program in Community Youth Work (CYW) through enhancing inter-regional cooperation in the countries of Western Balkans	
Description	The project intends to develop curriculum for the programme leading to the profession of Community Youth Work (CYW) at the universities of BA, MK, ME and RS, together with the EU partners from SE, IT, SI and AT. Although the profession had previously been active in the region its activity had ceased, and the project intends to reinstate the profession by means of training or retraining staff to take on this remit. The developed CYW programme is planned to be introduced in some Universities as to implement at BA level at once, while in others- more gradually, implementing electives as a first step.	
Specific Objectives	Introducing new curricula at the universities in the region; additional training of teaching staff and implementation of new teaching methods; inter-regional cooperation of academic, non-academic and NGO component.

Title	DEVELOPMENT OF MASTER STUDY PROGRAMMES IN EDUCATION
Description	The project seeks to create a new vision for Pedagogical higher education in three Balkan countries in line with the Bologna Process. The project has been designed to support policy-making on teacher training and development at the national level in all three Partner countries as part of the pre-accession process. It seeks to establish a new status for teachers through the development of professionalism in education and so provide a basis for the planning of pre-service teacher training programs.
Specific Objectives	 to establish a new vision and tradition for Pedagogical higher education, making profit of the experience of participating countries in line with the most advanced and successful available experience according to Western European trends. to establish a new status for teachers and the specialists of educational sciences. to contribute to a further development of professionalism in education. to provide concrete basis for the re-planning of pre-service teacher training programs. to create conditions for involving students and trainees in educational research.

Title	"COMPETENCE - Matching competences in higher education and economy: From competence catalogue to strategy and curriculum development"	
Description	This project aims to establish Competence and Observation Centres in higher education institutions within partner countries, and to develop procedures for assessing and improving the match between the competences developed by higher education institutions and those required in industry. The project has been identified since universities, governments and enterprises in the Partner countries generally lack awareness of the importance of cooperation between HE and the economy and the methods and instruments for boosting such cooperation.	
Specific Objectives	1) To develop or advance methodology and tools for assessing the match between skills andcompetences developed by institutions of higher education and those required by the labour market in 4 partner WB countries and develop recommendations for curricula adaptation 2) To found four Competence and Observatory Centres (COC) which will serve as a national knowledge transfer and trainings centre for relevant stakeholders and as a service centre 3) To conduct the knowledge/skills/competences analysis based on 8 pilot study projects.

Title	Opening University towards Society: Linking Education-Research- Innovation
Description	The aim of the project is to strengthen the links between education, research and innovation and to improve knowledge transfer between academia and industry. Activities will be geared towards identification of European best practice in these sectors, which will be adapted and implemented in relevant institutions in the partner countries.
Specific Objectives	 To understand the present status of the education-research-innovation activities related to knowledge transfer and academic entrepreneurship To define necessary measures at local, national and regional level – to initiate changes of legislature related to research, intellectual property rights and technology transfer To improve entrepreneurial and management skills of researchers and to raise awareness among the researchers about importance of research, innovation, IPR and entrepreneurship To develop sustainable networks among universities, industry and public authorities To disseminate results to stakeholders and general public.

Title	Designing and implementing of the NQF
Description	The objective of this 3-year SM project is to design and implement a model of National Qualifications Framework for the higher education, through accepted set of levels, in line with the political development priorities of Macedonia. In this developed model all learning achievements (learning outcomes, skills, competences) may be measured and related to each other in a coherent way that defines the relationship between all education and training awards in the HE in MK. Designed NQF will put the needs of the learner first and support the national objective of moving towards a 'lifelong learning society'. It will be the route through which the country will bring the education and training together in a single unified higher education system and enjoy international recognition.
Specific Objectives	* To design and develop a model of National Qualifications Framework for the HE, verified by regulation at ministerial level * Practical implementation of the NQF through accepted set of levels, in which all learning achievements may be measured and related to each other in a coherent way and which defines the relationship between all education and training awards in the HE in MK

Title	Creating R&D Capacities and Instruments for boosting Higher Education- Economy Cooperations
Description	The project aims to contribute to the creation of R&D capacities and instruments in line with TEMPUS-program objectives and wide priorities for Higher Education and Society (Knowledge triangle education-research innovation; Development of partnerships with enterprises), in order to support partner countries universities in fulfilling the central role in their national innovation systems and society according to European standards Lisbon convention and Bologna Process).
Specific Objectives	1. To support partner countries' universities (PCUs) in the modernisation and quality enhancement process of higher education by development of clear R&D strategies based on analytical assessment and benchmark analysis until 30. 6. 2009 2. To contribute to knowledge triangle of education, research and innovation at PCUs by establishing R&D Service Centres until 31.1.2010. 3. To support PCUs to approach European Higher Education Area (EHEA) and European Research Area (ERA) by implementation of models for strenghtening international cooperation networks among partner countries higher education institutions, EU universities (EUU), industry and society until 30.11.2011.
